How Japan Lost its Semiconductor Industry: The 5 strategic causes behind the long-term failure of Japan's Semiconductor industry are covered in this paper. Some were of their own making. Others were macroeconomic tsunamis that could not have been avoided. But they could have been adapted to, as some companies did. It also provides the lessons that can be learned from the errors made.

How Power, Performance, Area, and Cost relate to Moore's Law: Sunlin Chou discusses how managing these parameters have evolved over time in this 2004 conversation. As semiconductor chips get larger it would seem they would consume more power. Learn why this is not the case. Also, the new issues that were emerging as semiconductors crossed the 100nm barrier.
